

You should know the **PASS**-word for using portable fire extinguishers.

Pull the pin or release any other locking device.

Aim low, pointing the extinguisher nozzle at the base of the fire.

Squeeze the handle to release the extinguishing agent.

Sweep from side to side at the base of the fire until the fire is extinguished.

Remember, fire extinguishers are for small fires only - don't endanger yourself when using them. If you have used an extinguisher you should arrange to have it recharged immediately.

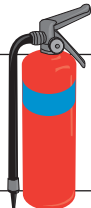

Printed in the interest of protecting life and property from fire.
